

pathoZoom® liveView Macro

Capture the view at the grossing station and frozen section site as high-resolution photos or broadcast it live to colleagues with **PathoZoom® LiveView Macro**. Automatically add macro pictures to a case by simply scanning its barcode, ensuring all medical images of the case are conveniently in one place – for better diagnostics and a streamlined workflow.

- Physicians can view these images alongside histological slides during reporting, obtaining a more comprehensive case overview
- Surgeons can interact directly with the frozen section station from the OR, enhancing real-time decision-making and collaboration

THE FEATURES AT A GLANCE

Work Together

- Stream video of frozen sections anywhere in real-time via the Internet
- Transfer your view to any device with a web browser for one or a hundred people
- Share the link or QR code instantly via text message or email
- Use the live stream to support young colleagues at the grossing station
- The presenter and the viewers can interact by drawing on the screen using their mouse or finger when a touchscreen is available

YOUR BENEFITS

FUNCTIONS FOR YOU

- Broadcast live and capture images of all events from the grossing station
- Capture photos with automatic assignment to the case via barcode
- Examine macroscopy and histology together in one place for a comprehensive view and better diagnosis
- Present specimens effortlessly at tumor boards and conferences

SERVICE FOR YOU

- Regular, automatic software updates
- Free Support Hotline

HELPFUL: LiveView MACRO is Here to Evolve Your Grossing Station

Macroscopy in Clear Images

- Capture high-resolution images of tissue samples with the touch of a button and save them either locally or in the PathoZoom® SlideCloud
- Thanks to our innovative streaming technology, your colleagues will always see the highest quality images, while our software makes sure not to strain the network capabilities of your lab

Interactive Features for More Details

- Use various annotation functions to mark, count or note important points and areas on the images
- After calibrating the camera, perform digital length and area measurements with just a few clicks
- Add text directly into the images, making communication easier with your colleagues

Easy Installation

- Install a camera over your grossing station and the PathoZoom® LiveView Macro software on your computer, and you're ready to go
- To view the images later, you need only an internet browser – it is compatible with all computers, laptops, tablets, and smartphones

Medical Product

PathoZoom® LiveView Macro complies with its Measurement Tool IVDR requirements and is marked with a CE label.
